

The Waste Disposal Dictionary From A to Z

 **SMALL** 
ACTIONS  **FOR**
 **BIG** 
RES  **ULTS**

Recycling:

a daily action that improves life

The Waste Dictionary is a practical manual that citizens can consult for the correct disposal of all their waste.

It contains a list of materials, in alphabetical order, and related information to start recycling and recovering as much material as possible.

It is dedicated to domestic users.

Non-domestic users must comply with current regulations for the proper disposal of special waste.

It is valid throughout the territory managed by Alia Servizi Ambientali S.p.A. However, waste collection systems vary by municipality, district, or area.

To find out:

- the waste collection system active in the area
- the addresses and operating hours of the Eco-centres
- the Eco-stops and Eco-vans, in municipalities where the service is active

Visit: **www.aliaserviziambientali.it**

Key

Collection type (symbols)	Disposal method (symbols)
Organic waste★ 	Eco-centre 
Paper and Cardboard★ 	Specialized companies 
Glass/Bottles, jars, vials, and glass containers★• 	Specific container (used clothes, medicines, cooking oil, batteries, and toners) 
Packaging and containers in plastic, various metals, Tetra Pak, and polystyrene★ 	Bulky waste collection <i>The home collection service can only be enabled if the material is disposed of together with other bulky items ---></i>  
Non-sortable waste 	Authorized dealers 
★ These types of waste can also be disposed of at the Eco-centres	
• Glass is collected separately. Where such collection is not enabled, this waste can be disposed of together with plastic packaging, metals, tetrapak, and polystyrene. To find out the collection system enabled in your municipality, visit www.aliaserviziambientali.it	

TYPE OF WASTE	TYPE OF COLLECTION	DISPOSAL METHOD	MORE INFORMATION
Acetone			Eco-van
Acids			Eco-van
Activated carbon			
Adhesive or packing tape
